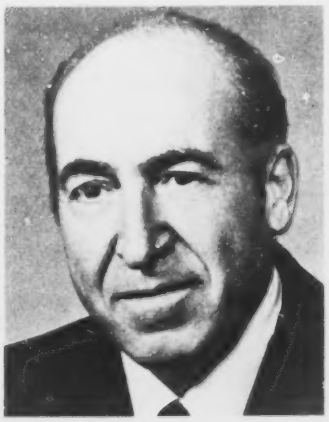
PRESIDENT'S MESSAGE

The continuing and growing internationalism of the motor vehicle industry is reflected in still another expanded edition of *World Motor Vehicle Data.*

This, the 20th annual edition of *World Motor Vehicle Data,* contains more information about our worldwide industry than ever before. A number of additional tables have been added including a section dealing with vehicle forecasts worldwide.

This year's *World Motor Vehicle Data* continues its fine record of being one of the most important resource documents on production, imports, exports, registrations and sales of motor vehicles around the world. I'm sure you will find it an excellent source of pertinent, reliable information.



V. J. Adduci
President

PREFACE

This statistical compilation of international motor vehicle data through 1982 includes production totals by manufacturers as well as by country. Since it is necessary to use different data sources from year to year, there are occasional differences in the number reported for various classes of vehicles for some countries. This is due to the lack of uniformity of definitions for certain vehicles. In such cases, car, truck and bus data vary from one source to another and, accordingly, in the year to year data reported.

Although special efforts have been made to segregate vehicle assembly data from production data, the world totals for production may include some duplication since it is not possible for all countries to identify assemblies from production.

The data in this report were supplied by foreign government agencies, trade associations, private services and the press. It should be noted that the basis on which the data are reported will vary. For example, vehicle output may be measured in terms of production, shipments, or factory sales. New vehicles sold may be measured in terms of retail sales or new registrations. Imports and exports are subject to problems of compilation and definition. As a result, data accuracies vary and international comparisons are, of course, affected by these discrepancies.

Data compiled by MVMA from various overseas sources. Information was obtained from published reports issued by various vehicle associations outside the U.S. and from a number of other sources considered reliable. Therefore, and because of the numerous complex factors involved in determining vehicle ranking worldwide, MVMA does not assume responsibility for the above classification.

Data compiled by MVMA from various overseas sources. Information was obtained from published reports issued by various vehicle associations outside the U.S. and from a number of other sources considered reliable. Therefore, and because of the numerous complex factors involved in determining vehicle ranking worldwide, MVMA does not assume responsibility for the above classification.

A - Passenger cars on the road
B - Passenger cars scrapped

1965 to 1978 data compiled by A.N.F.I.A.
1980 and 1981 calculated by M.V.M.A. based upon A.N.F.I.A.'s formula.

WORLD - MOTOR VEHICLE FORECASTS

F. James McDonald, President, General Motors (Remarks before the National Technical Conference Society of Plastics Engineers, September 20, 1983)

Sometime in the mid-1990's, new car and truck sales in North America could reach 20 million units for the first time. If that happens, total worldwide sales might approach 60 million units.....which would compare with the record year of 1978 when just over 38 million vehicles were sold.

J. R. Edman, Vice President, General Motors (Remarks before the Pontiac Economic Development Council, September 14, 1983)

General Motors economists see free world vehicle sales growing to 40 million units by 1985 -- from the 32 million of last year. That would be a new record, topping the previous high -- 38 million units -- reached in 1978.

For the second half of the decade -- GM economists say -- things look even better, with the trend reaching 45 million units by 1990.

Harry Stark, Editor, Ward's Automotive Reports (Ward's Auto World, September, 1983)

Greater attention by U.S.-based automakers to offshore markets is in the cards. The reason is obvious. As Dana Corp. Vice President/Economist William Prebe explains, yearly growth rates of 4% to 5% will be common in the world's less-developed regions through the 1990's. That, he says, should help lift global car, truck and bus production to 1978's 42.2 million record by 1986.

Ferdinand Beickler, Managing Director & Vice President, General Motors (Automotive News, July 18, 1983)

In a July 13 speech to the Automotive News World Congress, Ferdinand Beickler, Managing Director & Vice President of General Motors Corporation, said that he sees the European car market growing from its current 10 million units annually to over 12.5 million in 1990 and over 13.5 in 1995.

Beickler pointed out the differences and preferences of the various nations by noting that "in Italy, small cars accounted for nearly 45 percent of the 1.7 million units sold last year, while in Germany the small car share was just over 12 percent."

WORLD - MOTOR VEHICLE FORECASTS (continued)

Roger B. Smith, Chairman, General Motors (Automotive News, June 13, 1983)

General Motors thinks the European new car market will climb from the current sales rate of 10 million units to 11.5 million by 1985 and 13 million by 1990.

1983 U.S. Industrial Outlook, U.S. Department of Commerce, Bureau of Industrial Economics, January 1983

The Commerce Department estimates 1985 world passenger car and truck demand at about 35 million units and 9 million units respectively, for a total of 44 million units. This demand projection, when compared with world production capacity projections, indicates a continuing worldwide excess capacity problem.

Raymond R. Sekaly, Transnationalization of THE AUTOMOBILE INDUSTRY, Ottawa, Canada, 1981

World production of automobiles, trucks and buses recently stabilized at 40 million units annually, should rise to 50 million by 1990. As reflected in Raymond Sekaly's "Transnationalization of the Automobile Industry", the senior industry executives expect Europe and North American production to decline, Japan to increase from 10 million units to possibly 15 million per year, with the most significant production increases in less developed countries: Africa, Indonesia and Latin America.

* 1970-1982 data for Great Britain.

NOTE: From October 1982 all general goods vehicles less than 1525 Kgs. unladen weight are assessed for vehicle excise duty at the same rate as private vehicles. The previous private car & van taxation class has been replaced. The above figure shows for the first time registration by actual body type. The 1982 figures are not comparable with previous years.
